- Python
- Ruby
- HTML/CSS/Tailwind
- SQL
- Tableau/Looker Studio
- Google Cloud Platform
- Leadership
- Effective Communication
- Critical Thinking
- Fast Learning

LANGUAGES

- English (Native)

PROFILE

I am a self-taught software developer with over two years of experience in building robust applications and analytical solutions. My journey into programming began with simple HTML and CSS at age 10, eventually expanding to JavaScript and Python. I thrive on solving complex problems, whether it's developing intuitive user interfaces, optimizing backend systems, or delivering actionable insights through data analysis. My passion for innovation and continuous learning has fueled my success in roles that range from software development to data analytics.

WORK EXPERIENCE

Ion Solar

NOV 2024 - PRESENT

Full Stack Developer

- Designed and implemented new UI features and optimized user experience for proprietary sales apps, enhancing efficiency for field and web-based platforms.
- Developed and maintained backend API endpoints integrating data from systems like Salesforce, Google APIs, and others to enable seamless functionality.
- Collaborated on application design, screen layouts, and resolved critical bugs, ensuring high-quality, scalable software solutions.

Ion Solar

Nov 2023 - Nov 2024

Data Analyst/Engineer

- Engineered scalable ETL pipelines using Mage.ai and Python to extract, transform, and load data from Salesforce, Talkdesk, GoHighLevel, and other platforms into BigQuery.
- Delivered key business insights to executives, enabling data-driven decision-making, and created performance trackers for sales incentives.
- Built customized dashboards in Tableau and Looker Studio, providing teams and stakeholders with actionable metrics and sales performance insights.

Ion Solar

May 2022- Nov 2023

Sales Supervisor

- Led a team of 8 sales representatives, driving a 30% increase in team sales within 8 months through targeted coaching and workflow optimization.
- Conducted one-on-one coaching sessions and call reviews to identify and address performance gaps, while maintaining a position among the top 10 sales reps.
- Personally generated \$2.6 million in revenue and spearheaded strategies that improved organizational efficiency and team morale.
